

Empower Staff, At the Point of Care

Microlearning as a Service -- Customized for Healthcare

Equip, inform, and protect your frontline teams. Keep them on top of rapidly changing COVID practices, so patients are safer, and staff are secure.

COVID-19 and the Forgotten Challenge

Real-time, seamless access to current guidelines, protocols, and information is vital to effective containment and mitigation strategies. Similarly, rapid communication with frontline staff-- and the ability to hear their feedback and needs-- fosters reassurance and confidence at a time of stress and uncertainty. The COVID outbreak brings together national agencies/guidelines, state & county-specific reporting, and local site-specific practices-- all constantly evolving. As patient volume and acuity surge, **you need your staff ready and healthy** (both physically and emotionally).

Elemeno gives you an official and authoritative source of content, available in the moment, in the hands of every one of your staff. Deliver communication directly to each unit, clinic, or group. Measure engagement by each staff member. Collect real-time feedback from staff. Hear your team, and give them the support they need. **Deploy in one week. No IT needed.**

Case Study: UCSF Emergency Dept

UCSF ED leadership has streamlined COVID readiness training and ongoing communication to their staff through Elemeno.

"The Elemeno platform is absolutely critical to our ED response"
--- Dr. Jeanne Noble, ED Director of Disaster Readiness, UCSF

Elemeno COVID use-case in 1 min: <u>Client COVID experience</u> video

"We are LOVING Elemeno as the source of truth for all of our ED providers and staff at UCSF in the rapidly changing environment of COVID-19. Transformative for us."
--- Dr. Maria Raven, ED Chief and Vice-Chair of Emergency Medicine, UCSF

Patients are screened and managed appropriately; staff and other patients are protected; and govt agencies receive appropriate and timely reporting. Practices have been shared via Elemeno with other EDs in the UCSF system. Other institutions are similarly responding.

- "Elemeno enables staff to get the most up to date and accurate information for emerging diseases such as Coronavirus. With a large team working different shifts around the clock, leadership can now readily document staff review, audit staff learning, and collect staff questions and feedback."
 - ---- Dr. Bruce Auerbach, Committee on Quality & Patient Safety, American College of Emergency Physicians; former CEO, Sturdy Memorial Medical Center

What Is Elemeno?

Elemeno's point-of-care safety solution drives frontline adoption of the client's priority practices, through cloud-based just-in-time microlearning. We fill the gap between generic policy and actual bedside practice. We help our clients create custom content using their pathways, devices, and supplies, making on-boarding, in-servicing, and process improvement more efficient and effective. Accessible 24/7, on any device. Doctors, nurses, and staff are empowered. Patients are safer.
